DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claim is indefinite because it depends on itself. For examination purposes the claim has been interpreted as depending on claim 6. Clarification is requested.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 2, 5, 8 and 13-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Rose et al (US Patent No 6,171,548).

Rose et al teach an apparatus as claimed. See entire document, especially, Figures 5, 6 and 7 and the related description.

Art Unit: 1746

5. Claims 1-5, 8-12, 14 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al (US Patent No 4,877,964).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 1746

9. Claims 6 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al.

Tanaka et al teach an apparatus as claimed except for plurality of conveyors.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide more than one conveyor in Tanaka et al, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. St. Regis Paper Co. v. Bemis Co., 193 USPQ 8.

Allowable Subject Matter

10. Claims 18-24 are allowed.

11. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach or fairly suggest a method as claimed. While sanitation and or sterilization of different articles, including containers, by UV light was conventional in the art, as evidenced by the art cited by the examiner and by the applicants. There is no suggestion or teaching was found not to clean the used articles intended for reuse. The prior art fails to teach or suggest a method comprising the claimed steps, especially a step for checking cleanliness of the article and irradiating articles without washing.
